

IKON Document Workflow Solutions Integrated Product Suite

Capture/Manage/Output/Store

IKONiPlus

Intelligent Data Publishing Solutions

Working in partnership with Integrated Publishing Solutions, a recognised leader and innovator with over 15 years experience of developing business-critical publishing solutions, IKON has developed the IKON iPlus solution.

IKON iPlus is a unique intelligent data publishing solution that can transform publishing processes within the financial sector. IKON iPlus dramatically reduces document creation times whilst enhancing accuracy and speed to market of a wide variety of financial publications and client reports including Fund Fact Sheets and Reports, Pitch Books and Documents, Performance Reports, Client Statements and other report documents.

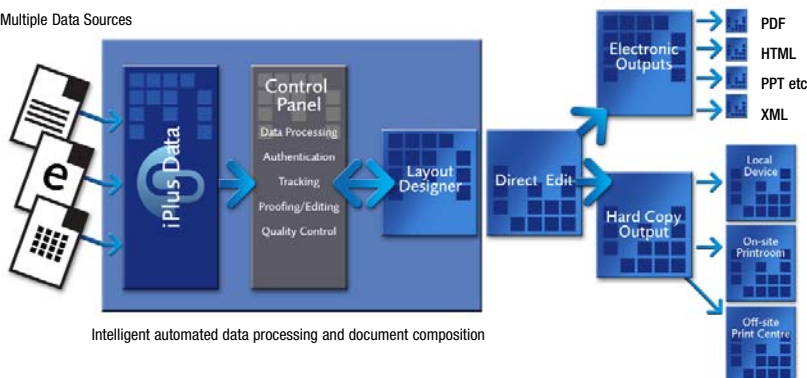

Original data can be automatically drawn from multiple disparate sources, then processed and artworked to pre-defined templates with controlled quality and proofing stages throughout, ready for publishing. Completed publications can be produced in hard copy via an integrated output infrastructure, with documents printed on-site by digital printers or off-site by dedicated digital print centres for forward distribution. Where hard copy is not required, each publication can be automatically distributed in a variety of application-specific formats direct to clients or distributors of such information.

In addition to delivering massive savings of as much as 75% of total document production costs, this publishing solution ensures consistency and accuracy of data, and is capable of rapidly producing a virtually unlimited number of completed publications and data sets, ready to market, all at the click of a button!

IKON iPLUS: DELIVERING REAL BUSINESS ADVANTAGE

- Automated capture of data from multiple disparate sources
- Automated processing, layout and distribution in paper or electronic formats
- Compliance-assured workflow processes with integrated tracking and approvals
- Integrated quality control and authentication through all phases
- Consistent branding and quality enforced by pre-defined templates for all publications and all output formats
- Simple creation of processes to publish new additional documents and information without additional headcount
- Automation of repetitive processes to produce accurate, quality controlled publications quickly and efficiently!

Multiple Data Sources

The **IKON Document Workflow Solutions Portfolio** is a comprehensive offering of end-to-end solutions designed to address document creation and management needs at all phases of the document lifecycle: capture, manage, output and store.

IKON selects products for the portfolio based on a flexible open architecture, the ability to integrate with common business applications and other portfolio products, and the functionality to deliver significant improvements in document efficiency.

IKON delivers the portfolio of solutions through its team of Professional Services specialists who assess, customise, install, manage and support end-to-end solutions.

This solution addresses the challenges of managing information throughout an organisation in all phases of the document lifecycle:

The movement of content into your repository for reuse, distribution and storage

The movement of content around your organisation and performance monitoring

Getting the content to the right audience on the right device

The options for keeping the content and finding it again

COMMON CHALLENGES FOR FINANCIAL PUBLISHING AND CLIENT REPORTING

- Labour-intensive and inefficient data sourcing and processing of data
- Long slow processes to produce finished publications to clients and markets
- Non-compliant publishing processes with limited control and auditing
- Inaccurate erroneous information provided to clients and markets
- Inconsistent branding and quality of publications
- Inability to develop new publications without increased headcount
- Continuous repetition of standardised reports and publications with no improvement in efficiency or base knowledge

ABOUT IKON

IKON Office Solutions, the world's largest independent channel for copier, printer and MFP technologies, delivers integrated document process solutions and systems, enabling customers worldwide to improve document workflow and increase efficiency.

With fiscal year 2006 revenue of \$4.2 billion, IKON has approximately 25,000 employees in over 400 locations throughout North America and Western Europe.

IKON integrates best-in-class hardware systems from leading manufacturers with document workflow software to deliver tailored, high-value solutions implemented and supported by its own global services organization.
